

HEALTHCARE TRIANGLE™

Reinforcing Healthcare Progress™

End to End Healthcare IT Managed Services

We offer comprehensive managed services to support healthcare providers' IT needs. The demands of maintaining and supporting your Health IT investment can be taxing. Our Healthcare IT Managed Services can help you handle fluctuations in-demand or backlogs caused by challenges in recruiting and retaining in-house talent. Healthcare Triangle's managed services offers:

Healthcare Application Managed Services

- Support services to manage EHRs
- Support services for 100+ third party applications (e.g. PACS, OnBase, etc.)
- Legacy support
- New EHR transition services
- And more...

Technology Provisioning

- Infrastructure as a Service (IaaS)
- Platform as a Service (PaaS)
- Supporting in managing specific on premises infrastructure or simple daily tasks like server patching and upgrades, reporting, data center support and testing, etc.

Technology Outsourcing

- Complete IT management in health system which includes managing, provisioning, supporting any EHR (Epic, MEDITECH, Cerner) and hosting in data center or the public cloud depending on your needs

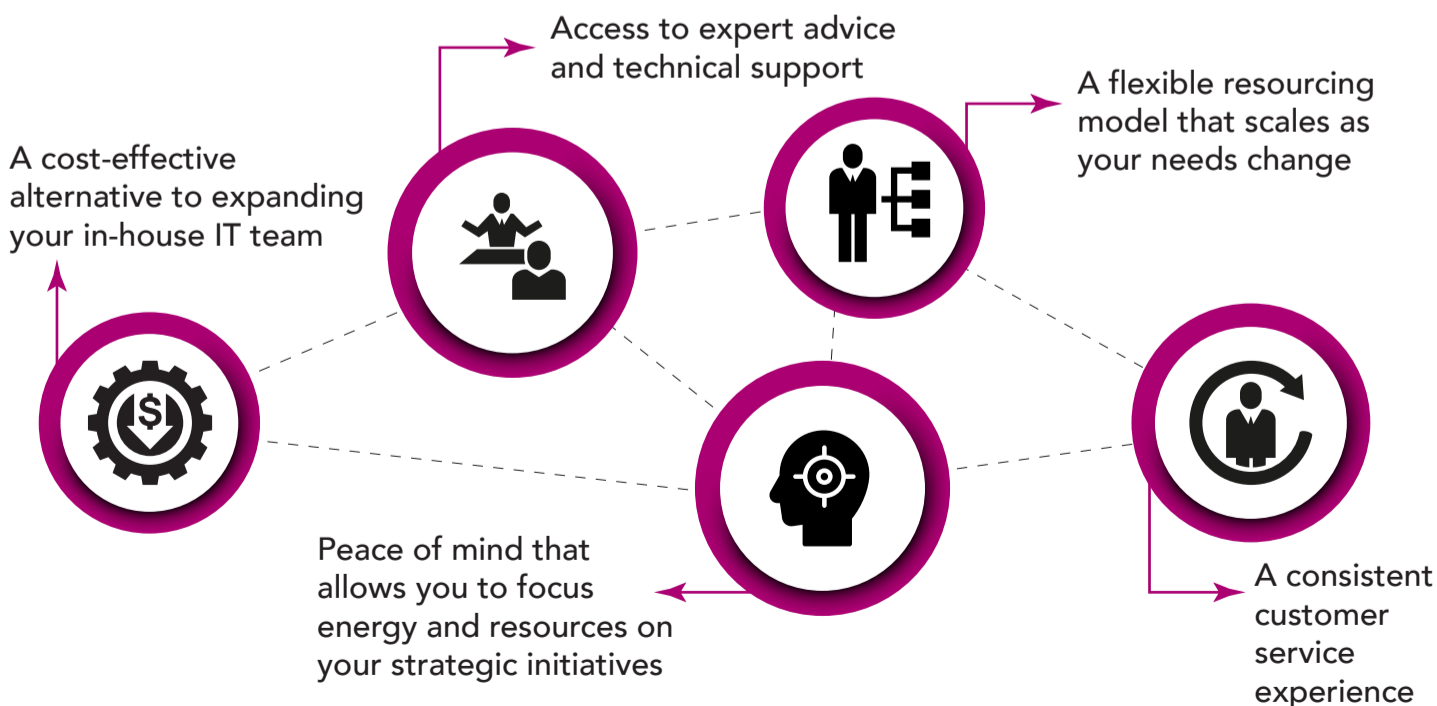

Support Levels

Not in need of full Health IT applications support... Get support for tasks you need!

We provide you with access to clinical experts, finance experts and technology experts to support you across applications with a flexible resourcing and pricing model where you choose a blend of resources based on your needs.
