

Reinforcing Healthcare Progress™

Provider Satisfaction and EHR Efficiency

SPARQ: **Specialized Process Assessment** **Reinforcing Quality**

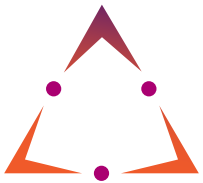

HCTI's SPARQ program provides an immediate substantial increase in provider satisfaction and efficiency.

Optimize Your Physicians' Usage and Satisfaction Through SPARQ

The SPARQ program is a step-by-step initiative focusing on optimizing EHR usage by providers. Each step seeks to increase overall provider satisfaction while assisting HIT staff in identifying gaps in technical build elements effecting workflow. The cycle of the SPARQ program utilizes client-side best practices in EHR optimization to deliver targeted provider support, creating a partnership between clinicians and HIT.

The SPARQ Approach

Through our research-based SPARQ approach, we take existing data on your target providers, complete a specialized assessment, and deliver targeted support to drive efficiency improvements. Providing physicians with the resources to efficiently use an EHR will positively affect physicians in both their personal satisfaction and systemically within an organization. Increasing efficiency and satisfaction impacts the revenue bottom line, reduces ticket volumes, and increases provider happiness within the organization.
