Driving Business Value in Pharma with Blockchain

The pharmaceutical industry is riddled with challenges related to data accuracy, privacy, and transparency affecting clinical trials, supply chains, and counterfeit drugs. With the looming deadline for compliance with the Drug Supply Chain Security Act (DSCSA)*, pharma leaders are anxious to put blockchain to work on the most challenging problems facing their industry.

According to a Global Data* poll, 29% of the respondents believe that supply chains could benefit the most from implementing blockchain, followed by the drug development process. These examples highlight why the pharmaceutical sector continues to move ahead and embrace blockchain, given its great potential.

Healthcare Triangle's HITRUST Compliant blockchain platform, Blockedge and our transformation services helps pharmaceutical companies bring drugs to market faster, at lower cost, manage supply chain processes and comply with the DSCSA regulations.

* Drug Supply Chain Security Act (DSCSA) / FDA
* Blockchain In Healthcare – Global Data

Blockedge is a blockchain automation platform that uses zero-coding to not only accelerate blockchain adoption, but also manage the ongoing network. It enables pharmaceutical companies to choose from multiple cloud providers and blockchain nodes to deploy your unique blockchain use cases via intuitive user interfaces.

Comprehensive Blockchain Transformation Services To Accelerate Your Business Transformation

1 Blockchain Consulting and Advisory

- Use case qualification
- Blockchain Protocol assessment
- Smart Contract Strategy
- IT Integration Strategy

2 Implementation

- Solution design
- dApps and Smart Contracts development
- Identity management
- Enterprise IT integration
- Production implementation

3 Network management

- Blockchain operations support
- Ledgers and transaction monitoring
- Continuous security and compliance

Blockedge Features

Here's Why Blockchain is a Game Changer for the Pharmaceutical Industry

The Drug Supply Chain Security Act with Blockchain

By 2023, pharmaceutical companies need to adhere to the Drug Supply Chain Security Act (DSCSA), which calls for tracking, producing, and dispensing drugs from raw materials. The DSCSA Act would also require supply chain leaders to adopt an "interoperable system" to track drugs across the supply chain. Many leaders in the pharma space are feeling the operational burden and the need to rethink their drug supply chain as they seek to comply with the DSCSA deadline.

We hear about these struggles, and our end-to-end blockchain infrastructure platform, Blockedge, helps pharmaceutical companies overcome DSCSA interoperability pain points while ensuring data integrity and maintaining privacy across the supply chain process. We make sure that you stay in compliance with DSCSA and meet the demands of your customers throughout the drug supply chain.

Blockedge integrates seamlessly with your existing IT infrastructure while ensuring hassle-free platform integration and automated network management. There is no coding prerequisite needed to run and manage your blockchain nodes on our UI-driven platform. We work along with you and ensure your supply chain is DSCSA compliant.

Accelerate Your Pharma Supply Chain with Blockedge

- Reduce blockchain network deployment time by up to 80%
- Minimize day-to-day operational overheads across the network by up to 60%
- Reduce overall risks with continuous security and continuous regulatory compliance
- Reduce costs by up to 80% leveraging advanced automation enabled by Blockedge
- Increase network uptime leveraging continuous alerts & monitoring as well as 24x7 Blockchain Operations Centre

Healthcare Triangle, Inc.™ (HCTI), based in Pleasanton, Calif., reinforces healthcare progress through breakthrough technology. HCTI achieves HITRUST Certification for Cloud and Data Platform (CaDP) to manage risks. We support healthcare and life sciences organizations improve health outcomes by enabling the adoption of new technologies, data enlightenment, business agility, and accelerating the value of their IT investments. HC/LS turn to HCTI for expertise in cloud transformation, security and compliance, data lifecycle management, and clinical/business performance optimization.
