Get the accessibility and flexibility of the cloud—without any of the headaches.

The move to the cloud has emerged as a game changer for life sciences, given the drive toward digitalization in pharma, biotech, medtech and more. It creates opportunities to not only lower costs and streamline business operations, but also to unlock data to collaborate across ecosystems and get more meaningful insights in drug development. In pharma alone, the cloud computing market is expected to reach $12.1 billion in 2022, up from $4.7 billion in 2017.

But taking advantage of the cloud's scalable computing and storage capabilities requires that life sciences companies invest in cloud infrastructure that is GxP and HITRUST compliant. In pharma, this ensures that developed drugs pass regulatory approvals and enhances pharmacovigilance.

To be successful, you need a partner that can manage that for you and help you quickly make the transition as painlessly as possible. Healthcare Triangle has done that with three of the top five global life sciences companies and can help you navigate a successful digital transformation as well with CloudEz.

CloudEz is a pre-fabricated, HITRUST-certified, fully managed, secure and compliant cloud foundation platform-as-a-service. That means that you can move to the cloud quickly and stay secure and compliant without having to manage it yourself.

Why choose a pre-fabricated platform?

The world's top life sciences organizations trust Healthcare Triangle's CloudEz platform-as-a-service because it:

➤ Allows you to rapidly request qualified infrastructure with a few simple clicks.
➤ Is a fully managed pay-as-you-go service with built-in security and compliance controls.
➤ Is continuously compliant, which ensures automated qualification and validation of the cloud infrastructure prior to deploying your applications.
➤ Is deployed in an agile manner with our industry-leading DevOps best practices and processes.
➤ Provides the framework to build a unique IP-driven, automation-centric, cloud-agnostic self-serve cloud infrastructure and service platform.
➤ Has 24/7 monitoring and alerting capabilities.
➤ Provides dedicated tenancy and containerized computing infrastructure for each customer.
➤ Offers our tested repository of compliant applications through an extensive service catalog.

Quantifying the Impact

Healthcare Triangle assists some of the world's largest pharma and biotech companies in deploying multi-cloud foundation platforms. Those companies have achieved the following benefits with no disruption to their business:

- ➤ Platform available for application onboarding in hours
- ➤ A pay-per-use cost structure that cuts costs on average by 30%
- ➤ The ability to run applications they could not support before CloudEZ
- ➤ On-demand scalability
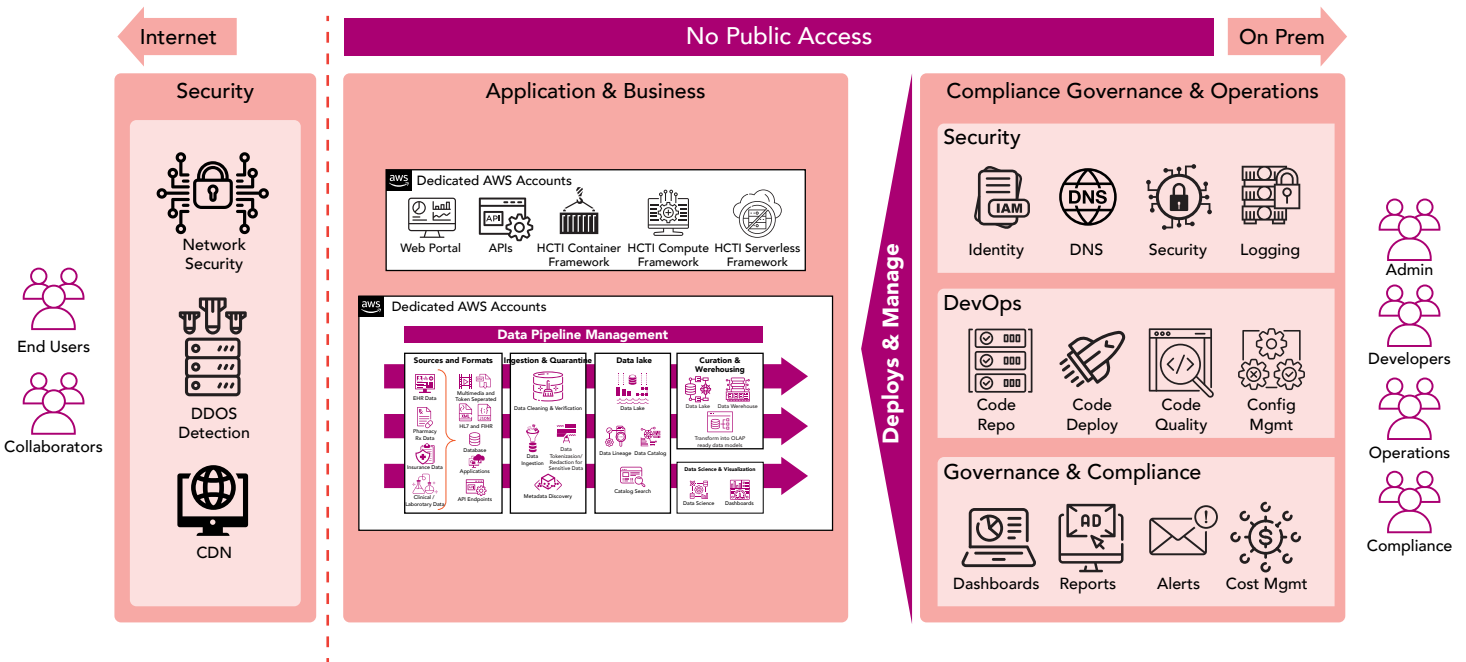

Enterprise Class Secure and Compliant Platform
