Pharmacy / Medications Inquiry (PMI)

When it comes to Meds, there's never TMI, so PMI!

Who Needs PMI?

If your hospital or clinic recently underwent an implementation or migration to a newer MEDITECH platform a Pharmacy Medication Inquiry (PMI) could benefit you.

PMI is a complete review of your Pharmacy Module (PHA) build and clinical functionality. The assessment combines system review and onsite workflow analysis. In a 2–4-week period our experts come onsite or schedule remote sessions to observe and gather information conducting interviews. These interviews are followed with a system configuration deep dive. At the conclusion of the "Check-Up", we'll provide you with a priority-ranked report of findings uncovering where you can focus efforts to achieve your best workflow improvement and positive financial impact.

PMI reports provide enhanced clinical decision support, implementation and optimization of underutilized functionality, streamlined clinical workflow, maximized revenue capture and reimbursement, identified opportunities for detailed clinical reporting and increased user satisfaction for both pharmacy personnel and providers.

Benefits from the PMI

- Increased clinical decision support through the use of tailored workflows, rules, and alerts
- Identification of lost reimbursement opportunities due to incorrect coding
- Streamlined Pharmacist/Pharmacy Tech workflow
- Development of new pharmacy module rules and custom reports

Why Are Check Ups So Important?

Regular screenings help find problems early or before they start. Meaning your chances for prevention or cure are better. By getting the right assessment services, screenings, and prescribed EHR configuration modifications, you're taking steps that help improve quality of care delivery, provider & patient satisfaction, that maximize your reimbursement, minimize lost charges, and strengthen your immediate and long-term financial health.

The TAO Check-Up Series is your proactive step in diagnosing, treating, and preventing common EHR Related challenges that the healthcare community faces.

What is the TAO Series?

The TAO Series is a series of Check-Ups available to hospitals leveraging Electronic Health Record technology. Each Check-Up is a low-cost, rapid assessment strategy uncovering targeted areas of opportunity (TAO) where an organization can take prescribed steps to improve.

Revenue Cycle Check-Up (RCC), Provider Experience Priority (PEP), Ambulatory Workflow Examination (AWE), and Pharmacy/Medications Inquiry (PMI) are popular options for 2021.

These check-ups are 1-4 weeks in duration, and help:

- Uncover millions of dollars of lost revenue and charges
- Re-energize physicians and improve their adoption and efficiency
- Give providers "one patient, one record" access while ensuring complete documentation
- Streamline clinical workflow
- Help hospitals win back the value from options from their EHR investments
