Public Cloud Backup

For Healthcare Organizations

Healthcare Triangle Inc (HCTI) - brings public cloud powered backup to healthcare organizations. Our EHR Cloud Backup gives industry leaders access to low cost, highly secure backup that assures their ENR, PACS, ERP, email and other essential data is safe and easily recovered if disruptions occur.

Frequently organizations find that the only records they have about patients is in the EHR. This information is of course critical to delivering care safely and efficiently. Corruption or loss of data can cause immeasurable damage ranging from operational inefficiency and added cost through endangered patient safety.

Our EHR Cloud Backup is provided through AWS which is the largest public cloud provider. Its capabilities rise above those of healthcare organizations and private hosting organizations. Bringing scalability, cost-effectiveness, security and durability.

No More Tapes!

Whether you're still using tapes for your primary backups, or you rely on backup tapes for your copy of last resort, it's time to get unstuck from tape and move to the cloud.

If you're still using tapes as a form of backup, it's now time to get unstuck and move to the cloud.

So, with our Cloud Backup powered by AWS, you can...

Say goodbye to...
- Manual tape management processes
- Data durability & validity concerns
- Costly CapEx hardware refreshes
- Low-value service contracts
- Slow tape retrieval and data restore
- Being unable to access offline data

And say hello to...
- Non-disruptive, low-effort migration
- Cost-effective, pay-as-you-go pricing with minimal upfront capital investments
- Reduced data center infrastructure footprint and archiving services contracts
- Stream lined back up processes, reduced manual effort, predictable retrieval times
- Data durability: Amazon S3 and Amazon Glacier cloud storage are designed for 99.9% of durability
- Readiness for applying analytics, AI, and machine learning capabilities to your data
