

Vendor agnostic cloud solution to tackle GxP and HIPAA needs

Multi-Cloud Service Providers for Business Operations:

Life Sciences and Healthcare Organizations leverage the advantage of the cloud technology for efficient business operations and innovation. However, large Organizations adapt the best in breed concept and use various products from multiple cloud providers namely AWS, Microsoft or GCP to run their business operations.

Every cloud provider is different from one another, in terms of, API, authentication mechanism or resource access and when different cloud providers are used, compatibility issues are bound to occur. The basic Cloud services utilized by a Lifesciences Enterprise include logging, monitoring, storage, disaster recovery, identity access management, security, infrastructure services, continuous monitoring of GxP/HIPAA regulations and ability to automate business processes, which might or might not be available in every cloud service provider.

Need for Vendor-Agnostic Cloud Solution:

When these large-scale organizations opt for more than one public cloud to utilize the best from them, a vendor agnostic framework is required to streamline their multi-cloud infrastructure so that their business operations will run in synergy. This framework must also offer a self-serve catalogue that allows you to choose the required services just-in-time to handle the business operations while meeting the HIPAA/GxP regulations continuously.

Pharma / Healthcare Vendor-Agnostic Infrastructure Framework:

Healthcare Triangle's CloudEz is a vendor agnostic, state of art Enterprise Cloud platform that powers highly regulated organizations with their enterprise-wide Cloud transformation. CloudEz offers the Healthcare and Life Sciences -organizations a continuous HIPAA/GxP compliant and secure framework for their infrastructure. This framework unleashes the low-cost, scalability and agility potential irrespective of the public, private or the hybrid cloud used to deploy their critical workloads and to maintain the business operations.

HIPAA/GXP Compliant Framework Attributes:

CloudEz framework provides an enterprise cloud engagement platform to manage and operate the cloud services effectively. There are certain features like Sandbox Service, Storage Service, Backup service, Billing service etc. which are common among business units irrespective of public clouds used and the CloudEz framework provides a platform with these services to overcome repetition and provide an agile environment. This drastically reduces the deployment time.
