

# HEALTHCARE TRIANGLE™

Reinforcing Healthcare Progress™

Despite significant investments in electronic health records, paper, faxes and unstructured reports are still a common way to share information about patients as they navigate the healthcare system. Because of the paper-intensive nature and need for efficient information management, while ensuring data security, healthcare organizations demand an advanced automation solution for image recognition, document analysis, and automation.

## readabl.ai

Uses state-of-the-art public cloud artificial intelligence and machine learning to recognize and extract healthcare information from documents, faxes, and narrative reports. Including readabl.ai in your workflow streamlines the process to improve patient care and clinical efficiencies while maintaining security & confidentiality. readabl.ai uses the public cloud, the AI and language processing models that are continually evolving and improving.

Cost reduction  
through labor savings

Streamlined patient care  
through faster processing

Accuracy through latest AI &  
language processing models

Scalability through the  
public cloud

## Some of the Applications We Support

Medical Claims

Prescription Refills

Outside Results

Medical Forms

Referrals and Orders

Legacy System Archiving

Vaccination Records

## Key Features of readabl.ai

readabl.ai streamlines healthcare workflows/processes and ensures the necessary health information is available for patient care with reduced labor requirements and faster processing.

Meets or Exceeds  
Security Standards for  
Handling of PHI

Web Browser  
Presentation

Integration to the EHR &  
other key applications

Single Sign-On Support  
to Streamline User  
Experience
